Founded by Dr. Franklin L. Miles in 1884, Miles, Inc., today known as Bayer Corporation, is a subsidiary of Bayer AG. Miles, Inc.’s original site in Elkhart, Indiana, is now the global headquarters for Bayer HealthCare’s Diabetes Care Division, its research and development activities, and its manufacturing facilities in Mishawaka, Indiana. The Bayer HealthCare group is one of the world’s leading innovative companies in the health care and medical products industry. It combines the global activities of the divisions of animal health, biological products, consumer care, diabetes care, and diagnostics and pharmaceuticals. Bayer HealthCare employs more than 35,000 people worldwide.

The Miles Foundation Endowed Library Collection in Science, established in 1989, enables the Hesburgh Libraries to purchase important materials in the physical sciences, life sciences, and mathematics. Major past acquisitions, all critical to undergraduate, graduate, and faculty research, include *Comprehensive Medicinal History*, *Grzimek’s Encyclopedia of Mammals*, *Comprehensive Organic Synthesis*, and *Reviews in Graph Theory*.
