Robert L. Pfeil ('49), a member of Notre Dame’s Advisory Council for the Hesburgh Libraries until his death in 2007, received his degree in electrical engineering. Formerly a senior vice president with Herrman & Goetz Electrical and Mechanical Contracting, Bob lived in South Bend but also resided part-time in Punta Gorda, Florida. He and his wife, Dorothy, who passed away in 2002, had two children: James, a senior CAD technician for the Utilities Department at Notre Dame, and Michael ('84).

Bob, a World War II Army veteran who participated in the European campaign, was a former chairman of the board and senior vice president of the construction division of Koontz-Wagner Electric Co., Inc., with 40 years of service. He served on the National Board of Governors of the National Electrical Contractors Association and, in 1983, was named a fellow of the Academy of Electrical Contracting. Bob was a member of the Eta Kappa Nu Association, the Institute of Electrical and Electronic Engineers, and the Electrical Contracting Foundation. He also served as a trustee of Holy Cross College.

The Pfeil Endowment increases the Hesburgh Libraries’ ability to keep up with information needs and resources in multiple formats as required by students and faculty in engineering and related fields. It supplies the University’s researchers with monographs, periodicals, and electronic resources, and brings the quality of these items increasingly in line with the quality of educational programs and research initiatives in electrical engineering at Notre Dame.
