"The American Dream:"
An Endowment in Support of its Study

A GIFT FROM
Joe and Gina Prochaska

The American Dream was a common phrase during the 1950–60s, but it’s regaining popularity as Americans — new and old — face this challenging economic time. The American Dream describes the hopes, particularly of immigrant families, to be able to own their own homes, have jobs, and send their children to college. This endowment will fund the acquisition of resources such as DVDs and books that are exemplary of those who have achieved the American Dream or possibly support seminars by faculty on this topic.
