This endowment was established in honor of Richard and Angela Wolohan’s 50th wedding anniversary by their children: sons Richard, James, and Michael, and daughters Kay, Patricia, Sharon, and Chris. All three of the Wolohan sons graduated from Notre Dame.

The senior Richard Wolohan is the founder and former chairman of the board of the Wolohan Lumber Company in Saginaw, Michigan. The younger Richard (’64) and his wife, Marsha, live in Maryland, where he is the comptroller for Guardian Fire Insurance Company. James Wolohan (’73) serves as president and chief executive officer of the Wolohan Lumber Company in Saginaw, where he and his wife, Terry, reside. Michael Wolohan, MD (’79), is an orthopedic surgeon in Saginaw, Michigan, where he lives with his wife, Marcia. Patricia Wolohan Kremin has a daughter, Teri (’93).

The Richard and Angela Wolohan Family Endowment for Engineering makes a significant difference in the Hesburgh Libraries’ collections in engineering. By supporting special needs for research materials in a broad range of disciplines at Notre Dame, it allows the libraries to respond with materials support for newly emerging and developing areas. Specifically, this endowment supports special materials in computer science and water technologies, including water chemistry, hydrology, water supply, wastewater treatment, and water pollution control, as well as a significant number of critically needed society publications.
