1. Reading a citation in a Bibliography (30 points)
   
a. Find 6 articles from the article bibliography.
   
   • Each of the 6 must be from a different source.
   
   • Minimum of 2 must be from print.

b1. For web journals: Print (pdf version) the first page of the article.

b2. For print journals: Copy the first page of the article AND copy the cover of the issue containing the article.

c1. For web journals: Record the abbreviated name, and full name for each source.

c2. For print journals: Record the abbreviated name, full name, and call number for each source.

d. Number each copy 1 through 6
   
   • Highlight and number the corresponding citations from the article bibliography – the number on your copy should match the number on the article bibliography.

   Hand in the article bibliography, 6 copies, and the abbreviated name, full name & call number for each of the 6 sources.

2. Select presentation time & topic (5 points)

   a. Before the next class meeting, contact Thurston Miller to select a compound and sign-up for a date to give your presentation.

3. Library Research Experience (5 points)

   Email your answers to Thurston Miller (miller.115@nd.edu) to the following before the next class meeting

   Describe your approach to doing library research when you were in high school or in college.
   
   Where did you go to find information? What resources did you consult?
   How successful were you? How did you measure success?
   How did the thought of (or process of) library research make you feel?
Batch your work to make this assignment go faster. Identify 7 or 8 unique sources for step one. Complete step one for all sources before going to step two. Complete step two for all sources before going to step three. At step three, once you have found your 6 sources then you can discard the 1 or 2 extra that you identified in step one and located in the catalog in step two. Why identify extra sources? – occasionally items can be checked out or mis-shelved or the publisher’s web server could be down or… Well, you get the idea.

1. Use CASSI (print version in the Chemistry Library OR http://cassi.cas.org/) to get the full journal name.  
   (The ND Libraries catalog does not index journal abbreviations.)

2a. Search CatalogPlus (ND Libraries catalog)
   **Type the full journal name**
   *Put the name inside quotes if it has more than one word*
   Limit results by: Resource Type: Journals

2b. Which record is for an online journal or a print journal?
   <Locations> link for print journals     <Access Online> link for online journals

2c. Does Notre Dame have access to the volume or year you need?
   Click the **Locations** or **Access Online** link to view the holdings information.
   
   Yes     Go to step 3
   No
   A. Maybe the journal changed its name or merged with another title. Click on the **Details** link and look for a Related Titles entry. Make note of the new title. Then go back to step 2a.
   B. The library does not have access to the volume/year you seek. Then you can request the article via inter-library loan.

3. If you selected a …

   <Locations> record
   i. Write down the library and call number in addition to the citation.
   ii. Go to that library and find the call number.
   iii. Use the citation to find the article you need.
   iiiib. Request the item from the Annex

   <Access Online> record
   i. Follow the Available Online via: <link> in the record.
   ii. Use the citation to find the article you need.

Annex requests made on Friday will be delivered on Monday
Example of completed assignment #1 to be handed in along with the article bibliography and copies.
